## Books

The Endeavour library holds a great collection of sustainable building books and resources, available for borrowing throughout the course. We will take requests to add additional resources from course participants throughout the program.

### Core Texts:

There are no formal requirements for textbooks in the Natural Building Intensive. However, these books are highly relevant to the course content, and you may want to purchase them and be familiar with the content:

***Essential Sustainable Home Design***, by Chris Magwood, New Society Publishers, ISBN 978-0-86571-850-0, \$39.99

This is a brand new book that gives a comprehensive overview of sustainable building options using a goals-based approach. The book is a direct result of the curriculum of this program!

***The Natural Building Companion***, by Jacob Deva Racusin and Ace McArleton, Chelsea Green Publishers, ISBN1-60358-339-8, \$59.95

***The Art of Natural Building, 2<sup>nd</sup> Ed.***, edited by Kennedy, Smith & Wanek, New Society Publishers, ISBN 0865714339, \$39.95

***The Visual Handbook of Building and Renovation, 4<sup>th</sup> Ed.***, by Charlie Wing, Taunton Press, ISBN 978-1-63186-879-5, \$49.95
